

DESIGN A CAMSAURUS

Be creative and imagine your own dinosaur, called Camsaurus, who lives by the river Cam today!

Living things are adapted to their habitats. This means that they have special features that help them to survive. What special features does your dinosaur have that help it survive in its Cambridge habitat? They can be as fun, weird and wonderful as you like. Remember to include these special features and label them, to be in with a chance of winning!

DESIGN A CAMSAURUS

To enter the Camsaurus competition:

- 1 – Draw your Camsaurus
- 2 – Email a photo of your drawing and contact details to competitions@grandarcade.co.uk
- 3 – The winner will have their submission turned into a soft toy!

The drawings will be judged by The Sedgwick Museum of Earth Sciences' team of dino experts! Entries open until 23rd April 6 pm.

If you need more inspiration, come to see dinosaurs from Cambridgeshire at
